Products > Airbus Products

Our comprehensive inventory of Airbus parts and components includes rotatable stocks, new consumables, kits, and accessory equipment. We also carry airframe components such as doors, cowlings and structural components including tail booms, stabilizers and tail cones.

We also stock hard to find items, unique to helicopter upgrade and refurbishment, including, seats, seat belts, interior products, electronic and avionic equipment, structural airframe parts, hydraulic and fuel components, flight controls and much more.

And through our vast experience and worldwide network of approved vendors and operators, we can practically find any part you need for your helicopter, including those out of production or long lead time components and parts that other suppliers can't offer.

So whether you are a tour operator in Las Vegas needing an engine or in need of a sliding door kit for a production aircraft in Australia, our knowledgeable and courteous sales staff will deliver on time, every time, with reliable components for every type of operation; anywhere in the world.

Customer Testimonials

“I wish to take this opportunity to thank you for your excellent service over the past three years, especially for your efficient work on AOG situations. EuroTec has provided the highest level of support through a substantial inventory coupled with a reliable, responsive and professional delivery of aircraft parts and services.

These attributes have contributed to the development of a long term relationship that will continue in the years to come.”

Henri Droog, Director of Maintenance

Helicraft 2000 Inc.
