Eudora, Kansas EuroTec Vertical Flight Solutions, LLC, a world-wide provider of Eurocopter and Turbomeca service and support, is pleased to announce the opening of EuroTec Canada, Inc. EuroTec's newest facility located in Toronto, Canada.

"EuroTec Canada will complement our existing operations in the US and is a tremendous fit with our Company's mission to support the safe and efficient use of helicopters," said Hoss Golanbari, the managing partner of operations for the new company.

The establishment of the Canadian subsidiary company will serve as a logistics hub for all goods and services offered by the Company including the return of components and engines for maintenance. "The site will further enhance our proximity of support," said EuroTec President and CEO Chad Decker. "Our Canadian customers will have immediate access to our inventory in case of an AOG situation. The new facility will stock a wide variety of parts and components as well as engine accessories, turbine modules and complete engine assemblies for exchange and rental thus, reducing overall costs for our customers. Our Canadian customers will no longer have to shoulder the expense in dealing with trans-border shipments."

EuroTec Canada, Inc. was formed in partnership with Hoss Golanbari who shall also serve as managing partner. "We are looking forward to working with Hoss" said Chad Decker. "His knowledge and understanding of the market and the needs of operators will benefit both the Company and its existing customers. Hoss understands the complexities that face today's operators; rest assured he'll put his skill

set and genuine care for customers first to help meet those concerns which will only reinforce our commitment and the level of exceptional support that EuroTec is known for; Welcome Aboard Hoss!”

Hoss Golanbari began his career in the helicopter industry in 1985 and has since then held various positions with leading industry companies throughout Canada. He has served as a quality engineer at Bombardier, DOM for Abitibi Helicopters, and general manager of Heli-Lynx Helicopters.

Founded in 2000, EuroTec Vertical Flight Solutions is an FAA certified repair station providing maintenance, repair and overhaul services for helicopters, components and gas turbine engines. Serving the light to medium helicopter industry, EuroTec offers Eurocopter and Turbomeca operators with the broadest range of support through Comprehensive Airframe and Engine Solutions (CAES) programs. These programs allow operators to achieve total fleet operational readiness.
