## EuroTec Canada, Dynamic Solution Systems Inc. sign key pact

June 5, 2014

By Carey Fredericks

June 5, 2014, Vista, Ca. - Dynamic Solutions Systems, Inc (DSS), the Original Equipment Manufacturer of the popular MicroVib II Aircraft Vibration Control System has chosen EuroTec Canada, Ltd. as a factory authorized agent and certified calibration laboratory for Canada.

Widely used by civil, government and military rotary and fixed wing operators worldwide, the MicroVib II Analyzer is the industry leader in aircraft vibration equipment and tracking software used to minimize vibration levels.

“The MicroVib II System has been utilized in Canada for more than 12 years and DSS is currently forecasting steady growth within the market. It made perfect sense to partner with a customer service oriented company like EuroTec Canada to help market and support our products,” said Rich Welsch, DSS Sales & Application Manager.

Under this new partnership, EuroTec will provide distribution, sales, product support as well as initial and recurrent training on DSS equipment to operators in Canada. “Our technicians are thoroughly familiar with the operation of the Micro Vib II and just recently completed factory training to repair and calibrate the equipment,” said Hoss Golanbari, VP and Managing Director of EuroTec Canada.

He added, “Our repair centre, located just a short drive from Toronto Pearson International Airport, will provide fast response and calibration turn-around-times for new and existing users of the DSS equipment.” This latest agreement serves to reinforce both companies’ ongoing commitment to provide superior customer service and support. By having distribution and calibration services in Canada, will not only improve overall customer satisfaction but also, alleviate cost and concerns that are typical with cross border shipments.
