## Garmin deal for EuroTec

Wed, 02/28/2018 - 13:42

EuroTec Canada (EuroTec) and EuroTec Vertical Flight Solutions, Kansas, US, have recently been awarded a Garmin

Dealership. This partnership means customers can turn to EuroTec for an expanded suite of turn-key aviation solutions. "Access to Garmin's leading aviation products means we are able to provide our customers the very best in avionics solutions," stated EuroTec founder and President Chad Decker. "Garmin absolutely compliments our longstanding completion and retrofit capabilities."

With most rotorcraft OEM's choosing the Garmin platforms, this dealership enhances EuroTec's ability to offer clients a true, complete Garmin system for their overall avionics suite. "The dealership also provides the ability to reduce overall cost to our end users thanks to providing incentive discounts on multi-system installations and completions," added EuroTec Canada VP, Hoss Golanbari.

"The team at EuroTec continues its commitment to helping aircraft owners achieve operational excellence, in a cost-effective manner," said Decker. "This partnering with leaders in the aviation industry allows us to meet that goal for our valued customers. We welcome the opportunity to better serve the helicopter industry."
